

# **Agreement on the supply of plant DNA material by the Botanic Garden and Botanical Museum Berlin- Dahlem (BGBM)**

Since the Convention on Biological Diversity (Rio de Janeiro, 1992) entered into force, it has become necessary for botanic gardens to comply in particular with Article 15 (Access to Genetic Resources), especially in connection with the exchange of plant material. Accordingly, the BGBM only passes on plant material under the condition that the user acts in the spirit of the Convention on Biological Diversity.

The BGBM is dedicated to the conservation, sustainable use and research of biological diversity. With regard to the acquisition, maintenance and supply of plant material, the BGBM therefore expects its partners to act in a manner that is consistent to the letter and the spirit of the Biodiversity Convention, the Convention on International Trade in Endangered Species (CITES) and in compliance with all relevant conventions and laws relating to the protection of biological diversity.

Consequently, only those persons and institutions who accept the following conditions will receive DNA plant material from the BGBM's collection:

1. On the basis of this agreement, the material is intended to serve the common good/goal, particularly scientific study, education and the interests of environmental protection.
2. Upon accepting DNA from the BGBM, the recipient is obliged to document and preserve information relating to the material appropriately.
3. In the event that scientific publications on the DNA material provided are produced, the origin of the material is to be cited. In addition, these publications are expected to be sent to the BGBM automatically, without request.
4. Intended commercial use by the recipient is not covered by this agreement. The commercialisation is the object of a separate agreement with the country of origin. This agreement underlies the provisions of the CBD, i. e. the user is obliged to share benefits with the country of origin and to forward relevant information to the authority instructed with the implementation of the CBD<sup>1)</sup>.
5. The BGBM will forward information on the material supply on request to the authority instructed with the implementation of the CBD<sup>1)</sup>.
6. DNA material may only be supplied on the basis and under the conditions of this or corresponding agreements.

I accept the above conditions.
