## **1. Einführung**

Für das Jahr 2014 hatten wir eigentlich eine Exkursion im April und Mai nach Nordost-Griechenland in die Nomi Kavala, Xanthi und Rodopi geplant. Aus beruflichen Gründen konnte dieser Plan nicht umgesetzt werden. Stattdessen fuhren wir vom 13. September bis 23. Oktober in den Nordwesten des Landes in den Epirus (Ioannina) und nach West-Makedonien (Grevena, Kozanis, Kastoria, Florina, Pella und Imathia). Diese Region ist zwar für die Monate April bis Juni recht gut untersucht, für den Herbst zeigen aber die ersten beiden Bände der Flora Hellenica erschreckende Lücken, was sich besonders in den Familien Amaranthaceae, Chenopodiaceae und Polygonaceae zeigt. Wir selbst haben diese Region noch nie im Herbst besucht.

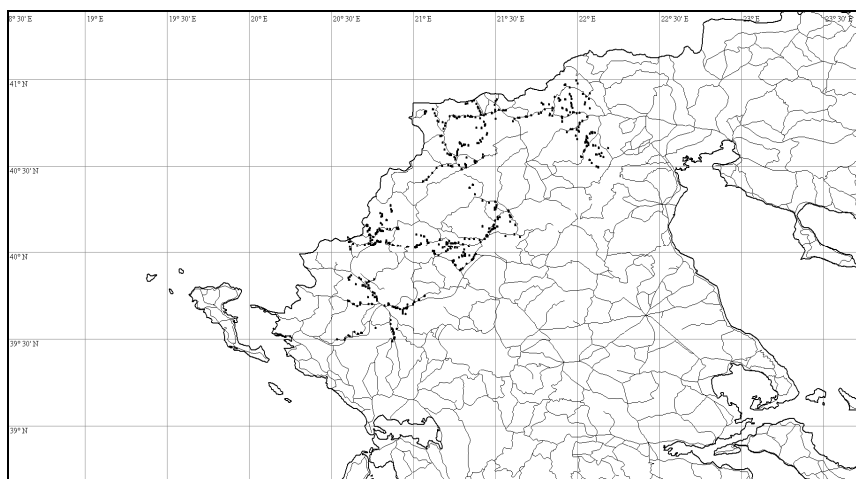

Die optimale Terminierung solcher Herbst-Exkursionen erweist sich immer wieder als problematisch, weil der Zustand der Pflanzenwelt entscheidend vom Wetter in den Sommer-Monaten abhängt, die entscheidenden Reisevorbereitungen aber bereits im Frühjahr geleistet werden müssen. In Ioannina hatten wir den Eindruck zu spät angereist zu sein, in West-Makedonien schienen wir gerade zum richtigen Zeitpunkt zu sein, da gerade die spätblühenden Arten in Hochblüte waren.

Insgesamt mussten wir feststellen, dass die mittleren Lagen – zumindest im Herbst – bisher schlecht untersucht sind und dass viele Verbreitungsangaben in der Flora Hellenica Vol. 1 und 2 nicht die tatsächliche Verbreitung der Arten, sondern den bisherigen Stand der Feldbeobachtungen beschreiben. Besonders das Kapitel der Chenopodiaceae müsste komplett überarbeitet werden, da es der Vielzahl der Arten, der Variationsbreite innerhalb einzelner Arten und natürlich der Verbreitung der Arten nicht gerecht wird. Vermutlich hat es zum Zeitpunkt der Bearbeitung an ausreichendem Herbarmaterial gemangelt. Wir gehen davon aus, dass die Beobachtungen auch für Mittel- und Ost-Makedonien, sowie für Thrakien gelten. Hier sind noch ausführliche Feldbeobachtungen notwendig, die aber aus Kapazitätsgründen kaum von Besuchern aus dem Ausland geleistet werden können. Wünschenswert wären regionale und lokale Arbeitsgruppen in Griechenland, die eng mit der Zentrale der Flora Hellenica vernetzt sein sollten. In diesem Zusammenhang stellt sich uns wieder einmal die Frage, welche Institution in Griechenland zukünftig die Arbeiten der Flora Hellenica leitet und koordiniert.

Wie im vergangenen Jahr haben wir noch konsequenter Pflanzen fotografiert. Allerdings nicht konsequent genug, da wir die Bedeutung einzelner Arten im Gelände nicht erkannt haben. So gibt es leider nicht für alle gesammelten Arten Bildmaterial, aber für alle fotografierten Arten vom Fundort Belege. Ausgewählte Bilder haben wir im Kapitel 3 eingefügt. Weiteres Bildmaterial, allerdings nicht das Gesamte, ist auf der Homepage [www.willing-botanik.de](http://www.willing-botanik.de) einzusehen. Bei Bedarf, vor allem für wissenschaftliche Zwecke, sind wir natürlich bereit Originalbilder im jpg-Format oder komprimiert für Dokumente abzugeben.

Auch diese Sammelreise einschließlich der Aufarbeitung der gesammelten Pflanzen wurde ohne Unterstützung von uns selbst finanziert.

Unsere Reiseroute und die bearbeiteten Fundstellen zeigt Fig.1:

Die interessantesten Fundstellen waren jahreszeitlich bedingt Ruderalflächen entlang der Straßen und an Ortschaften, Feucht-Biotope um Teiche und Seen und an Bächen, kleinere Hangsümpfe, Gräben entlang der Straßen, die zum Teil schon recht trocken gefallen waren. Interessant waren wieder einmal Baumaßnahmen im Straßenbereich mit ihren vielen Sand- und Kiesaufschüttungen. Die Wälder oberhalb von 800 m waren zum größten Teil sehr trocken, dennoch hat sich hier das Suchen nach *Hieracium* und *Pilosella* gelohnt.

Krautreiche und felsige Hänge waren zwar noch grün, aber insgesamt weniger ertragreich, vor allem in Regionen, in denen intensive bis intensivste Beweidung durch Kühe, Schafe und Ziegen stattfand. Besonders negativ erschien uns die aus unserer Sicht hoffnungslos überintensive Beweidung im Westen von Grevena im Hügel- und Bergland östlich der Vasilitsa. Ein Absuchen der Flächen war wegen Arten wie *Colchicum*, *Crocus*, *Sternbergia* und *Spiranthes* dennoch notwendig und sinnvoll.

Auch mit dieser Sammelreise haben wir sicherlich keine wesentlichen, für Publikationen geeignete Erkenntnisse gewonnen, aber vielleicht einen kleinen Beitrag zur Verbreitung der Arten geleistet. Ausgewählte Verbreitungskarten in Kapitel 3, die allein auf unseren Belegen basieren, können den Zugewinn an Verbreitungsdaten gegenüber *Flora Hellenica* Vol. 1 und 2 zeigen. Überraschenderweise konnten wir ein paar Arten finden und dokumentieren, die für NW-Griechenland, für das griechische Festland oder für ganz Griechenland neu sind. Diese Arten wollen wir hier gesondert hervorheben:

***Senecio inaequidens*:** Für Griechenland ist die Art bisher unbekannt.

Nun haben wir die Art am Rande einer gut befahrenen Überlandstraße gefunden: Kastoria, SO Fotini (Kas 247), Krautfluren zwischen Straße und Obstbaumentpflanzung, 40°31'30"N, 21°23'20"E, 06.10.2014, Wi 249.558

***Leonurus marrubiastrum*:** Die Art wurde immer wieder auch für Nordgriechenland angegeben. Sie wurde aber aus der aktuellen Liste der griechischen Gefäßpflanzen gestrichen, weil einige frühere Angaben als zweifelhaft angesehen werden. Gemeldet wurde die Art 1902 von Halácsy, der sich auf eine Sammlung von Heldreich "In dumosis humidiusculis pr. Katerina" [nomos Pierias] bezog (Hinweis von A.Strid). Der Fund konnte offensichtlich nie bestätigt werden. Nun konnte die Art etwa 150 km entfernt in der Präfektur Ioannina nachgewiesen werden: S Ioannina (Ioa 918), Felshang mit *Q. coccifera*-Gebüsch, 39°33'11"N, 20°52'34"E, 16.09.2014, Wi 244.804

***Bidens frondosa*:** Die Art ist für Bulgarien als bisher südöstlichstem Land vor wenigen Jahren berichtet worden. Nun zeigt sich, dass *Bidens frondosa* neben *Bidens cernuus* und *tripartitus* zumindest im Nordwesten Griechenlands durchaus nicht selten ist. An neun verschiedenen Stellen haben wir sie, vorausgesetzt einer korrekten Bestimmung, gefunden und dokumentiert.

***Dysphania anthelmintica*:** In *Vascular Plants of Greece* wird die Art nur für die Ost-Ägäis angegeben. auf dem griechischen Festland ist sie bisher nicht nachgewiesen worden. Sollte sich unsere Bestimmung bestätigen, scheint die Art von Nordwesten her nach Griechenland einzuwandern

***Solanum physalifolium*:** Gemäß *Vascular Plants of Greece* ist die Art bisher nur auf den Kykladen gefunden worden. Vorausgesetzt unsere Bestimmungen sind korrekt, scheint auch diese Art von Norden her in das griechische Festland einzuwandern und kommt verschiedentlich gemeinsam mit *Solanum decipiens* vor, von der sie sich aber schon im Gelände deutlich unterscheidet.

***Chenopodium*:** Im gesamten Gebiet fielen uns Pflanzen auf, die wohl *Chenopodium album* im weiteren Sinne zuzuordnen sind, deren Laub aber mehr oder weniger stark rot gefärbt sind. Diese Pflanzen sind gemäß der uns vorliegenden Literatur keiner Art zuzuordnen.

Von 1994 bis 2014 hat das Herbarium Willing 223.087 Belege für die *Flora Hellenica* bereitgestellt. Wir haben uns die gesamte Zeit um die niederen und mittleren Höhenlagen gekümmert, die unserer Meinung nach in den ersten beiden Bänden der *Flora Hellenica*

deutlich unterrepräsentiert sind. 12.902 Fundstellen liegen in einer Höhe bis 1500 m, nur 104 Fundstellen zwischen 1520 und 2020 m. Wir haben also im Wesentlichen einen Beitrag zur Verbreitung der Pflanzenarten des griechischen Festlandes zwischen Meereshöhe und 1500 m Höhe geleistet. Dass die Belege des Herbariums Willing für vielfältige wissenschaftliche Zwecke genutzt werden, trägt sehr zu unserer Motivation bei, dieses arbeits- und zeitintensive Hobby bis heute durchzuhalten. Nicht gerade motivierend ist es dagegen, wenn in einer ausgesprochen hilfreichen Publikation des Botanischen Garten und Botanischen Museum Berlin-Dahlem nicht nur die Autoren des Herbarium Willing unzulänglich zitiert werden, sondern auch Botaniker unsere Belege als ihren eigenen Beitrag ausweisen. Im Privatleben nennt man das „sich mit fremden Federn schmücken“, in einer wissenschaftlichen Publikation ansonsten hoher Qualität müsste man ein solches Vorgehen deutlich anders nennen.

Wir werden trotzdem unsere Spaziergänge durch die Flora des griechischen Festlandes fortsetzen, soweit es Kopf und Körper zulassen. In 2015 werden wir im Wesentlichen die Nomi Xanthi und Rodopi besuchen, für 2016 wollen wir die Herbst-Studien des letzten Jahres in Mittel- und Ost-Makedonien fortsetzen.

Über die Präsentation der Flora Hellenica sind wir als „blümchensammelnde Hobbyisten“ ausgesprochen unzufrieden. Warum gibt es keine Internetplattform „Flora Hellenica“, die zumindest zu folgenden Themenbereichen jeweils aktuelle Informationen bereitstellt:

- Organisation, insbesondere Benennung der griechischen Verantwortlichen
- Mitarbeiter, Bearbeiter und Ansprechpartner für Familien und Gattungen
- Regionale und lokale Arbeitsgruppen in Griechenland mit Kontaktadressen
- Durchgeführte und geplante Reisen
- Bedarf an Belegen (Familien, Gattungen, Arten, Regionen und Zeiträume)
- Kurzmeldungen zu Problemkreisen und aktuellen Funden
- Aktuelle Veröffentlichungen zum Themenkreis

Wahrscheinlich sind viele dieser Informationen im „Inneren Kreis“ der Flora Hellenica verfügbar, sie sollten unsere Meinung nach aber gebündelt, regelmäßig aktualisiert und über das Internet den Mit- und Zuarbeitern und der interessierten Öffentlichkeit zur Verfügung gestellt werden.

Alle in diesem Bericht aufgeführten Belege sind ab Anfang April 2015 im Botanischen Garten und Botanischen Museum Berlin-Dahlem verfügbar.

## 2. Fundorte

### **3. Arten (mit Herbarbelegen)**

Wir haben in diese Liste ausgewählte Pflanzenphotos eingefügt. Umfangreiches Bildmaterial liegt bei uns vor, eine größere Auswahl ist auf [www.willing-botanik.de](http://www.willing-botanik.de) einzusehen.

#### **Abies cephalonica**

245.696, Ioa 965, O Konitsa; 247.849, Gre 431, SO Lavdas

#### **Abutilon theophrastii**

244.448, Ioa 900, S Lingiades; 245.266, Ioa 941, SO Kato Lapsista; 245.599, Ioa 960, SO Kalpaki; 245.811, Ioa 970, S Piji; 245.978, Ioa 978, W Konitsa; 246.042, Ioa 981, Melissopetra; 248.289, Gre 459, SO Grevena; 249.012, Koz 369, W Kaloneri; 249.063, Koz 370, SO Neapolis; 249.608, Kas 250, N Korisos; 250.211, Flo 218, Karyes; 250.699, Flo 241, N Kladorrachi; 251.041, Flo 258, SW Meliti; 251.183, Flo 264, O Polypotamos; 251.320, Flo 274, Vevi; 251.453, Flo 279, Kella; 252.082, Pel 307, S Kerasies

#### **Acer campestre**

245.890, Ioa 974, NW Elefthero; 246.308, Ioa 996, Amaranthos; 248.958, Koz 366, S Kaloneri; 252.332, Pel 320, N Sotira; 252.595, Pel 333, Flamouria; 252.720, Ima 137, N Naoussa; 253.063, Ima 154, SW Arkochori

### **Acer monspessulanum**

244.698, Ioa 913, O Asprangeli; 245.761, Ioa 968, S Piji; 246.231, Ioa 990, N Konitsa; 251.486, Pel 280, NW Arnissa; 251.756, Pel 292, S Panagitsa; 251.808, Pel 294, N Ag. Dimitrios; 252.040, Pel 306, S Kerasies

### **Acer obtusatum**

246.214, Ioa 989, N Konitsa; 246.827, Ioa 1027, SO Aetomilitsa; 247.558, Gre 410, SO Alatopetra; 247.763, Gre 426, N Perivolaki; 247.792, Gre 427, N Perivolaki

### **Acer platanoides**

250.055, Kas 274, O Vyssinea; 250.478, Flo 232, O Pisoderi

### **Achillea**

249.381, Kas 237, Nestori; 249.890, Kas 264, Kefalari

### **Achillea coarctata**

248.616, Gre 476, NO Vatolakkos; 248.735, Koz 358, NW Paleokastro; 249.037, Koz 369, W Kaloneri; 249.519, Kas 246, SO Fotini; 249.728, Kas 257, NW Kastoria; 249.813, Kas 262, NW Koresti; 249.851, Flo 212, O Vatochori; 250.093, Flo 213, S Prasino; 250.271, Flo 220, N Lefkonas; 250.425, Flo 229, O Vigla; 250.484, Flo 232, O Pisoderi; 250.578, Flo 236, Florina; 250.655, Flo 239, N Florina; 250.792, Flo 246, O Kratero; 250.908, Flo 251, S Tripotamos; 251.207, Flo 266, Drosopigi; 251.351, Flo 274, Vevi; 253.383, Ima 169, O Fytia

### **Achillea collina**

246.600, Ioa 1015, SO Ag. Paraskevi; 249.917, Kas 265, N Kefalari; 250.717, Flo 242, N Kladorrachi; 250.892, Flo 250, O Armenochori; 251.035, Flo 257, SW Meliti; 251.389, Flo 276, Vevi; 251.548, Pel 283, Proasti; 251.751, Pel 292, S Panagitsa; 251.795, Pel 293, SO Vryta; 252.004, Pel 304, Zervi; 252.098, Pel 308, Kerasies; 252.648, Pel 337, Ano Grammatiko; 252.678, Pel 338, Rodochori

### **Achillea crithmifolia**

247.018, Ioa 1037, W Pades; 247.351, Ioa 1042, NO Distrato; 247.956, Gre 438, Avdella; 248.005, Gre 440, NO Mikrolivado; 248.176, Gre 453, NO Kipourio; 249.450, Kas 242, S Mavrochori; 249.529, Kas 246, SO Fotini; 249.734, Kas 257, NW Kastoria; 249.985, Kas 270, S Ag. Antonios; 250.023, Kas 272, Vyssinea; 250.111, Flo 214, Prasino; 250.156, Flo 217, S Karyes; 250.222, Flo 219, Lefkonas; 250.341, Flo 225, Florina; 250.593, Flo 237, N Florina; 251.168, Flo 263, SW Tropeouchos; 251.707, Pel 289, Nisi

### **Achillea millefolium**

246.987, Ioa 1036, W Pades; 247.265, Gre 393, Samarina; 250.673, Flo 240, N Florina; 251.196, Flo 265, O Polypotamos; 251.412, Flo 278, Kella; 251.653, Pel 287, WNW Agra; 252.116, Pel 309, W Kerasies; 252.147, Pel 311, W Kerasies; 253.116, Ima 157, Kato Vermion

### **Achillea setacea**

247.314, Ioa 1041, NO Distrato; 250.480, Flo 232, O Pisoderi; 251.265, Flo 271, SW Drosopigi; 252.186, Pel 313, W Kerasies; 252.529, Pel 330, Platania

### **Acinos alpinus** subsp. **alpinus**

246.633, Ioa 1017, Pyrgos; 246.831, Ioa 1027, SO Aetomilitsa; 249.847, Flo 212, O Vatochori; 252.349, Pel 321, N Sotira; 253.071, Ima 155, SW Arkochori

### **Acinos alpinus** subsp. **meridionalis**

246.630, loa 1017, Pyrgos; 247.344, loa 1042, NO Distrato; 248.072, Gre 444, SO Mikrolivado; 248.091, Gre 446, O Kranea; 248.746, Koz 359, NW Paleokastro; 248.930, Koz 365, SW Mikrokastro; 250.426, Flo 229, O Vigla; 251.386, Flo 276, Vevi; 251.464, Flo 280, Kella

**Acinos suaveolens**

252.028, Pel 305, S Kerasies

**Adiantum capillus-veneris**

245.624, loa 961, SO Kalpaki

**Aegilops triuncialis**

247.761, Gre 426, N Perivolaki

**Agrimonia eupatoria**

244.251, loa 889, NO Anthochori; 244.562, loa 906, N Ioannina; 244.950, loa 926, NW Perdika; 245.104, loa 934, NO Mazia; 245.423, loa 951, SO Voutsaras; 245.544, loa 958, SO Kalpaki; 245.813, loa 970, S Piji; 245.838, loa 971, S Piji; 245.959, loa 977, NW Konitsa; 246.027, loa 980, W Mazi; 246.087, loa 983, SW Kalovrysi; 246.195, loa 988, N Konitsa; 246.304, loa 996, Amaranthos; 246.409, loa 1003, Nikanor; 246.524, loa 1010, W Ag. ### **4. Nachträge**

#### **Erodium brachycarpum**

Im April 1995 haben wir in Messinia ein Erodium gesammelt, das wir als Erodium malacoides bestimmt haben. Hans Runemark hat den Beleg 2004 revidiert und als E.brachycarpum bestimmt.

Messinia, 2,1 km NW Valta, fette Weidewiesen und Feuchtwiese an Bach, 260 m, 37° 06' 30"N, 21° 36' 00"E, 20.04.1995, 38477.

Die Art wird in Vascular Plants of Greece nicht aufgeführt.

#### **Eruca vesicaria**

Dank der Nachbestimmung und Korrektur durch J. Krause, wofür wir uns herzlich bedanken, konnten die Belege, die wir fälschlicherweise als Raphanus raphanistrum bestimmt haben, den korrekten Namen Eruca vesicaria erhalten.

#### **Lepidium densiflorum**

Am 28.7.2000 sammelten wir in Pella eine Pflanze, die wir als Lepidium ruderales bestimmt haben. Attila Takacs von der Universität Debrecen hat sie nun als Lepidium densiflorum bestimmt.

Brassicaceae, Lepidium ruderales L., GR, Pella, Ep. Edhessis, N Aridhea (Pel 118), Laubwald an Bachlauf, 60 m, EL 83.87.84, 40°58'59"N, 22°03'19"E, leg. R. Eisenblätter & E.Willing, 86.225

Dieser Migrant, diesmal aus N-Amerika, kommt in Österreich in allen Bundesländern vor und scheint sich nach Süden auszubreiten.
